

Housing maintenance

Cleaning

On arrival, your accommodation must be in a clean and tidy condition.

It is your responsibility to maintain it regularly and to leave it clean when you move out.

To help you maintain your accommodation on a daily basis, here are some tips:

- **Ventilate your rooms at least 10 minutes a day.** Open your windows. Don't forget to close them properly if you are going to be away.
- **Regularly Dust surfaces.** Clean your windows. Sweep, vacuum and wash the floor, including under furniture (bed - desk - table).
- **Descale all your valves and fittings.** Descale thoroughly with a descaling agent or white vinegar (economical and effective). Scrub your washbasin from the inside and outside with these products.
- **Regularly clean and descale your shower/tub and toilet** (if equipped). Do not use scouring agents or products containing ammonia.

Do not forget to clean the shower drain (hair, dust, etc.).

- **Clean your ventilation grids.** To be done from time to time, if necessary, with soapy water or degreasing agent (washing-up liquid or other).
- **Remove grease from your hobs.** Remove grease with a degreasing agent or bicarbonate of soda. Also clean your sink to avoid limescale.
- **The day before your departure:** Defrost your fridge before you unplug it. Clean it inside, outside and underneath (in addition to regular inside cleaning).
